## HAROLD MCKELVEY HONORED BY GOV. FURCOLO AND SECRETARY OF STATE WARD

Harold W. McKelvey was appointed Notary of Public of Mass. by Governor Foster Furcolo and his appointment was unanimously confirmed by the Governor's Council. He was further honored by being sworn into this office by his friends of many years, Secretary of State, Joseph Ward and Representative, Thomas Donahue at the State House.

Mr. McKelvey has been most active in business, politics, military and veteran affairs for many years, and is a Past Chairman of the Wilmington

Town Democratic Committee, Past Commander of three veteran organizations: The American Legion, The Veterans of Foreign Wars, and The Disabled American Veterans.

He is an excellent public speaker and was on the speaking staff of the late Governor, Honorable James M. Curley Maurice J. Tobin and Gov. Paul A. Dever, and also Governor Foster Furcolo on many occasions has referred to him as Mr. Democrat of Mass. He served as Secretary of State Joseph Ward's Chief Floor Leader and was most active in promoting the election and re-election of Governor Furcolo and Representative Thomas Donahue.

## AVCO TO UNVEIL FIRST RECOVERED ICBM NOSE CONE

### INTERPLANETARY SHOCK WAVES REPRODUCED: SPEEDS EXCEEDING 1 MILLION MPH OBTAINED

Everett, Mass. -Avco Corporation today announced that its research laboratory in Everett, Mass., has duplicated the interplanetary shock waves traveling in excess of 1,000,000 miles per hour from the sun to the earth. These shock waves result from solar "flares," a particularly violent form of sun spot activity.

Using an Avco 30-inch shock tube triggered by an electrical charge of 4 billion watts, the Avco-Everett Research Laboratory was able to reproduce for the first time thin shock waves which cause magnetic storms around the earth and disturb radio and telephone communications. The million mile an hour gas velocities are believed to be the highest ever achieved in a laboratory.

The announcement was made as the corporation prepared to dedicate an associated facility, the vast new Avco Research Center at nearby Wilmington, Mass. The Research Center is occupied by Avco-Everett's sister division, the Research and Advanced Development Division. The Research Center is concerned primarily with the design, development and test of ICBM nose cones and other space age problems. Sixteen million dollars of corporate funds have been invested in this facility.

The experiments at Avco-Everett were under the guidance of Dr. Arthur Kantrowitz, director of the Laboratory and vice president and director of Avco Corporation. Dr. Kantrowitz is internationally known for his work in high-temperature gas dynamics and shock tube technology.

The Everett Laboratory has had the major responsibility for research on the re-entry heating problems of the intercontinental ballistic missiles Atlas, Titan and Minuteman. Data obtained by the Avco-Everett Research Laboratory was fed to contractors on the IRBM and ICBM re-entry problems, resulting in the saving of months of time and millions of dollars in the nation's highest priority defense project.

Joining Dr. Kantrowitz in today's announcement was Prof. Thomas Gold of Harvard and an Avco consultant. In 1953, after hearing a lecture by Dr. Kantrowitz in Cambridge, England, Dr. Gold first advanced the possibility that interplanetary shock waves exist. He pointed out that the gas thrown out by solar flares traveled the 100 million mile distance to the earth, "squashing" the earth's magnetic field with great suddenness.

(Continued on page four)

## FIRE CHIEF BOUDREAU COMPLAINS OF INADEQUATE FIRE ALARM INSTALLATION IN SCHOOLS

A per chance incident made Fire Chief Boudreau aware of the fact that a Fire Detective Alarm System was being installed in our schools. Mr. Boudreau at Monday night's meeting of the Board of Selectmen appeared with a representative of the Minneapolis Hunnewell Instrument Company to protest the installation of the fire detective system which they both termed, "inadequate."

Selectman Charles Black asked Chief Boudreau why he had not contacted T.M. Calabrese when first learning of this, to which Chief Boudreau replied he was unable to contact the Town Manager.

Chief Boudreau felt strongly that he should of at least been notified of this installation in his capacity as Fire Chief, feeling that he could have at least offered some corrective suggestions.

Two schools have been completely wired for this protective fire detective installation, and it was the feeling of Mr. Boudreau that further installation should be terminated.

A meeting has been arranged with T.M. Calabrese and the representative of Minneapolis Hunnewell to investigate this matter further.

## WOBURN ST. CITIZENS WANT TO KNOW WHY

Several citizens of lower Woburn Street met with the Board of Selectmen last Monday night to ask the reason for delay in repairing Woburn Street.

Woburn Street has been in a constant mess since installation of the Sewerage System which was installed for Avco.

T.M. Calabrese pointed out that he only has twelve men on the highway department and as they are currently engaged on street-operations on Shady Lane Drive, they could not be spared.

Frank Hagerty strongly pointed out that this condition should be remedied, immediately, to which Calabrese stated that he would call the highway department off Shady Lane Drive and take care of the situation.

The residents of Woburn St., left the Board of Selectmen room---hopeful.

## WILMINGTON WOMENS' CLUB ANNUAL LUNCHEON

The Wilmington Womens' Club will hold its annual spring luncheon on Thursday, May 21, at the '1775 House' on Route 2 in Lexington at 1 p.m.

This is always one of the nicest social affairs of the club year. Reservation cards have been mailed to all the members and it is hoped that replies will be received by May 16.

The committee in charge is as follows: Mrs. Raymond McClure, Mrs. Laurence Dowling, Mrs. Harold Garrett, and Mrs. Frank Stevens, Chairman.

Mrs. George Stevens and Manager Frank Riley shown at their new dairy counter at the newly opened Stevens' Farm Dairy on Main Street.

## STEVENS' DAIRY FARM OPENS

Stevens' Dairy Farm on Main Street (next to Shamrock Drive-In) announces that their curb service windows are open for business.

They carry a complete line of home made ice cream flavors which includes milk shakes, frappes and sundaes.

In the near future the horse-shoe dining room will be opened to serve the public a full selection of fried foods such as shrimp, clams, potatoes and chicken. They have also arranged for take-out service. This dining room is completely air-conditioned.

The owners are Mr. and Mrs.

George Stevens of Andover, former owners of Stevens' Supermarket. It is managed by the most capable Frank Riley, who opened, trained and managed the Food Basket in Billerica for three years prior to the present ownership.

Mr. Riley is a graduate of the Wilmington School System and spent four years in the Navy.

He now resides with his wife and two children, in Melrose. His wife, Christine (Mohlitz) is also a past resident of Wilmington and resided with past-superintendent of schools Mr. Stephen Bean.

Opening hours have been set for 11 a.m. to 11 p.m. daily, and they will remain open all year.

## ATTENTION DOG OWNERS!

The Wilmington Board of Health has made arrangements to hold their anti-rabies immunization clinic on Saturday, May 16 between 1 and 4 P.M. at the Highway Department Building.

All dog owners are requested to have their dogs vaccinated against rabies, licensed or not. Fee is 75¢ with Dr. Gardiner Lester administering.

## BURLINGTON AVE. BRIDGE BEING REPAIRED

The Burlington Avenue bridge which has been closed for the past two days because of loose planking is being presently repaired and is expected to be ready for use within the next day or so.

PONY LEAGUE THANKS  
COMMUNITY FUND

The Wilmington Pony League wishes to publicly thank the Wilmington Community Fund for their contribution of \$500 to their team.

With this amount of capital it enables them to field a team in the Reading and Stoneham Leagues. Without this donation, this might not have been possible. Wilmington Community Fund is financially backing this team.

Many thanks are extended to Unit Packet, Avco, Geldart Chevrolet and the Wildwood Parents' Club for their sponsorship. However, due to the large donation from the Wilmington Community Fund, these organizations will be reimbursed their most gratifying donations.

Thanks are also extended to the public for their share in contributing to the Community Fund, which made it possible for the amount given to the Pony League. Indirectly, one and all are responsible in combating juvenile delinquency by keeping the youngsters off the street, and occupying them in this morale building sport.

We are looking forward to a successful year, and hope to see a large turn-out of parents at all home games.

Come and see the team at their best, in their new uniforms.

Opening game is in Stoneham, Saturday, May 23 at 2 p.m.  
First home game is Tuesday, May 26 at 6 p.m.  
See you then!

Bob Hastings, President  
John Waugh  
Secretary  
Treasurer

## V.F.W. SOCIAL

The V.F.W. post 2458 is to hold their monthly social at post quarters, Saturday, May 16. A surprise menu is in store.

Monthly drawing and door prize to be awarded.

MIDDLESEX COUNTY  
NATIONAL BANK OPENS NEW  
OFFICE

A new office of the Middlesex County National Bank will open for business on Monday, May 11, at 10 A.M. at 132 Park St., North Reading Center. This will be North Reading's first bank, and will bring to the community the complete facilities and services of the largest national bank in Middlesex County.

Oliver T. Bergstrom, the bank's president, announces that North Reading will be the fourteenth community to be served by Middlesex County National Bank, and that this will be the bank's eighteenth office.

In addition to Mr. Bergstrom the directors of the bank are Norman F. Barrett, Charles W. Bartlett, Newell A. Clark, Robert M. Edgar, Joseph E. Hollingworth, Herbert W. MacLeod, Kenneth G. Macquarrie, Louis Rismann, Edward J. Saunders, Edward W. Sexton, Robert P. Tibolt and Albert W. Vanderhoof.

BOOSTER CLUB ANNUAL  
BANQUET

The second annual Booster Banquet will be held June 6 on Saturday, at 6:30 at the High School Gymnasium.

Reservations can be made by contacting Mrs. Faulkner, OL8-3828, George Dyas OL8-4123 or Bob Hastings, OL8-3457.

Students may obtain tickets from Coach Bellissimo at the High School.

Donation \$2.25 for all who attend. The public is extended a cordial invitation to attend.

DON KIDDER EMPLOYED  
FULL TIME LOCALLY

Chairman of the Board of Selectmen, Don Kidder has resigned his position with the Office File and Equipment Co. of Boston and will now be engaged in full time employment with Louie's Oil of Wilmington.

JENI JANERICO

Styling

HOW MANY times have you said "Next Monday, I'll start to diet!" Or "day after tomorrow." Why not today? Of course it's easier to buy clothes for a good figure. And slender girls get more compliments. But doctors say slender folks live longer... feel lots better, too.

Usually diet should be combined with exercise to tone and "tighten" your body. But consult your doctor before beginning strenuous bending and stretching. He'll tell which exercises are right for your physical condition.

NEW FIGURES are more fun with new hairstyles! Your coiffure style can actually make you look taller, slimmer, younger. For instance, square jaws take on pretty oval lines when hair goes up at the temples, rather than back. Let's get together and discuss your problems soon!

YOUR FACE is bound to be looked at when your hair is noticed, so you'll want to enlist the services of a good hairstylist to be sure every feature is shown off to best advantage. For instance, soft, high puffy bank will balance a receding chin-line. And ladies with too-little chins often look stunning with a curled chignon-effect at the back of the neck.

MON.-TUES SPECIAL

Our new "Bouffantatie" supplies the soft hair styling needed for too-hollow cheeks or too-deep smile lines. If your problem is lank, lifeless hair, we'll solve it with another modern kind of magic: A fine new professional permanent wave. (Ahh, the beautiful difference!)

Many a lady has found gleaming hair keeps eyes from straying to the hips! Brush your hair often. (A good setting won't come out!) Use a bit of hair dressing daily if your tresses tend to be dry. Stubby ends of oily hair need dressing, too, to keep them neater.

Are you a round-faced darling? You can lengthen your face to oval-like proportions with the witchery of bangs! We'll use just a few pretty fringe-like bangs for you—off-center, to one side of the forehead only.

OPEN ALL DAY MON. TUES.  
AND SAT. 9-6  
THURS. AND FRI. 9-11.

WILMINGTON PARENT  
TEACHER COUNCIL  
SCHOLASTIC FUND BALL

On Saturday evening, May 16 at 8. The Wilmington Council of PTA will present its Third Annual Scholastic Fund Ball in the beautifully decorated High School gymnasium with an Underwater decor predominating.

The proceeds, as always, will be for scholarships to those deserving graduates who plan to enter college or Normal School in pursuit of teaching careers. These awards have been regularly made during past years, but this year possibly three students will be eligible.

Therefore, the Council hopes this will be a banner event financially. Socially, it will be a success, for it is an event always eagerly awaited in town.

The music will be by Norm White and his orchestra; Mr. Ken Lyons will act as Master

of Ceremonies; there will be best dancer awards; the Gourley dance team will present a delightful dance exhibition; and refreshments will be available. Mrs. Ruth Gourley, the very popular dancing teacher for the school children in ballroom dancing, will give Cha Cha instructions at the dance to all interested persons.

ROTARIANS TO VIEW  
MISSILE SITE

WILMINGTON ROTARIANS have joined with Burlington and Arlington Rotarians in accepting an invitation by the U.S. Army Anti-Aircraft Command to tour the big NIKE missile defenses in Woburn and Burlington on May 27. Arlington is to play host to the two local clubs at their regular luncheon-meeting on that date. The regular meeting in Masonic Hall in Wilmington has been cancelled.

Wednesday's meeting was presided over by President Henry Foster with Sergeant at Arms, Ralph Swanson leading the flag salute and former secretary, and honorary member Rev. Stanley Cummings giving the invocation. Visiting Rotarians were introduced by Fred D. Cain. They were: Earl Van Horn of Reading and Larry Dallin of Winchester. Introduced also by Fred were several guests of the club. Mr. Allick Epstein of Louis' Oil Company was guest of Ray Fitch. Mr. Paul Post and Ed Monahan of Fred Cain's Chrysler, Inc., were guests of Fred F. Cain. Rudy Dietrich was guest of John Cafiso. Introduced also were honorary members Rev. Stanley Cummings and John Nitchie.

Edward Curtis of 156 Andover Street, Wilmington, who won the local public speaking contest recently, and the coveted trip to the Hotel Frontenac in Quebec, returned to the club to give his impressions of Canada. It was obvious from young Curtis' remarks that his hosts in the Canadian province made his visit a most enjoyable one and one that he will remember for a long time to come.

Principal speaker at the meeting was Nils Liden, Rotary Foundation Fellow from Sweden. Mr. Liden's address gave an insight into life as it is today in his home country. The speaker is 28 years old and hails from Jonkoping, Sweden. After graduating from Chalmers University of Technology in Gothenburg, he became a Rotary Foundation Fellow and chose the Massachusetts Institute of Technology to advance his studies in Mechanical Engineering. He arrived in the United States in September last year and plans to return to Sweden this June. Chairman, Ed Osberg of the International Services Committee presented Mr. Liden with the Four-Way-Test Plaque of Rotary as a remembrance of his visit to Wilmington.

Announced at the business meeting by President Foster was a meeting of the Stoneham Rotary Club on May 14th at which the distinguished senior Senator from Massachusetts, Leverett Saltonstall is to be guest speaker. Wilmington Rotarians have been invited to the meeting, which is to take place in the Senior High School in Stoneham at 6 p.m. All reservations must be in by May 11 in order that the Stoneham club can plan for the dinner.

Announced also was the annual convention of Rotary International in New York (June 7-11). Top speakers and top entertainment have been planned. It is expected that more than 16,000 Rotarians from all over the world will descend upon the metropolis during the convention. Many local Rotarians have made reservations for the event.

Absent from the Wednesday luncheon in order to represent Wilmington at the District Assembly were President-Elect Bill Stevens and Secretary-Elect Henry Porter. Brief reports on the Spring convention and ensuing Ladies Night

were given by Willard Pipes and Harold Foley. Both were credited with the record-breaking, prize-winning delegation of Wilmington Rotarians and Rotary Annals at the Swampscott meeting.

It was with profound regret that the club accepted the resignation of Rev. Dick Harding who has so capably filled the shoes of former secretary Rev. Stanley Cummings. Dick is planning to return to school soon, and Wilmington Rotary is to be deprived of his services for the time being at least.

TROOP 60 CAMPING TRIP

The boy scouts of Troop 60 will spend an overnight camping trip on Friday, May 15 at Camp Forty Acres.

The scouts will engage in a conservation program which will include the planting of trees, etc.

PAUL BUDD SERIOUSLY  
INJURED

Paul Budd of Bancroft St., was seriously injured at 1:25 a.m. on May 10 when the car he was operating on Middlesex Ave., went out of control. The car left the roadway, crashed through a guard rail, struck two cement posts and finally came to a stop, embedded between two trees.

The accident occurred near the intersection of Federal St. Mr. Budd was taken to St. John's Hospital in the ambulance, suffering severe head and facial injuries. He was later transferred to Chelsea Naval Hospital.

Mr. Budd's vehicle was towed to Cain's Garage. Officers Dolan and Mercier investigated

SUBSTITUTE BILL#1208 was signed by his excellency Governor Foster Furcolo--enabling the Town of Wilmington to control future removal of gravel, loam and soil.

SALESPERSON  
WANTED

Man or woman to sell real estate in Wilmington. Must be a local resident, ambitious, thoroughly honest, with a pleasant personality. Experience not necessary, we will train qualified applicant. This is hard work, requiring time evenings and weekends; but highly remunerative to conscientious worker. Call Mr. Gilley, Manager, James T. Trefrey, REALTOR, 26 Church St., Winchester, Mass. PARKVIEW 9-6100. M-13-20-27-J-3

Overall profile view of the new \$23,000,000 Avco Research Center to be dedicated May 14 at Wilmington, Mass. It includes the firm's new Research & Advanced Development Division. Located thirteen miles north of Boston, the Center is built on a 100-acre wooded, park-like site which furnishes a unique, cloistered and restful suburban atmosphere of great attraction to the 2,300 scientists and administrative personnel employed there. The facility consists of six buildings--Administrative, two Laboratories, an Experimental Manufacturing Building, and Arc Wind Tunnel and Ballistic Range buildings. All major buildings are connected by enclosed, covered passage-ways. At left is one of the two Laboratories, which flank the Administrative office, center. At right is the huge Experimental Manufacturing Building. As shown in the photo, both Laboratories are supported on free-standing columns at the base of a gently rolling hill.

#### (SHOCK WAVE REPRODUCED)

(Continued from page 1)

However, this suddenness could not be explained by physical principles then understood. Shock waves until then were known to depend upon the collision of molecules or other particles of matter. There simply were not enough particles in space to support the energy transfer of a shock wave by particle collision.

Gold suggested that perhaps the shock wave traveled by collision of "force fields" surrounding hydrogen ions and electrons. It was this "thin" shock wave that was produced at the Avco-Everett Research Laboratory which confirmed this theory. The shock wave is actually thinner than the "mean free path" of the particles in the shock heated gas.

The significance of this experimental work lies in the clearer understanding of very high temperature (ionized) gas called "plasma," its nature and how to confine and direct it by magnetic fields. One and one-half million degree gas temperatures are obtained in the electric shock tube. At this temperature, all known matter would vaporize instantly. In the apparatus, this ultra hot gas is confined within a "magnetic wall."

By using a rarefield mass of hydrogen, pushed by a magnetic field tightly confined in the shock tube on every side except one, velocities in excess of 1,000,000 miles per hour were obtained. The 4 billion watt electrical impulse needed to achieve this wave is produced in the laboratory by discharge from powerful condensers in two millionths of a second.

The electric shock tube which produced this thin, high-speed shock wave was developed by Dr. Richard Patrick, an Avco physicist, expert in the young science of magnetohydrodynamics (MHD). Earlier experiments at the Avco-Everett Laboratory had obtained high temperatures in a "pill box" apparatus which produced cylindrically converging shock waves in deuterium gas. Drs. G. Sargent Janes and Harry Petschek and Nelson Kemp, all physicists at the Laboratory are widely known for their contributions to current understanding of MHD. Much of this research has been sponsored by the Air Force Office of Scientific Research in Cambridge, Mass.

Aerial view of the new \$23-million Avco Research Center, Wilmington, Mass., to be dedicated May 14. Large structure, top center, is the giant Experimental Manufacturing Building. Immediately to its left are the two Laboratories, flanking the Commons or Administration Building. Note: connecting covered passageways; six light wells, with large trees protruding above roof level; parking facilities for over 1,200 cars; park-like setting of the 100-acre site. The new home of Avco's space-missile research center employs 2,300 top scientific personnel.

Twenty-seven per cent of the Avco Research center staff are degree-holding scientists and engineers, the highest ratio of technical personnel to general employees among the large research and development companies in Massachusetts.

Completion of the new Avco Research Center at Wilmington, Mass., marks a milestone in the growth of the company's research and development organization.

The Research Center, devoted to basic and applied research and development in the major scientific disciplines, includes unique laboratories, support facilities and equipment, and is second to none in the country. It is now the permanent home of the Research and Advanced Development Division and later also will house the Avco Research Laboratory.

The Center represents a principal portion of more than \$16,000,000 Avco has invested in its facilities in the Boston area, exclusive of special equipment provided by the Air Force.

Avco began laying plans in 1955 for a complete facility in support of the company's important pioneering research and development programs. During the previous year the company had organized a small group of leading scientists to carry out projects connected with finding a solution to the critical ICBM re-entry problem.

Today this nucleus has grown into an organization staffed by more than 2500 scientists, engineers and supporting personnel.

The new home of Avco's research organization, which was occupied by the Research and Advanced Development Division during the summer of 1958, is located on an 80-acre tract 13 miles north of Boston. Four main buildings—for research, administration, development, and experimental manufacturing—and two smaller structures, housing test facilities, provide more than 500,000 square feet of productive floor space.

The design of the Avco Research Center was conceived to provide an atmosphere attractive to the finest scientists and engineers, combining the creative thinking found on a university campus with the definitive goals of leading industrial enterprises.

Through its pioneering work in support of the Air Force ICBM program and its continuing studies of earth satellite design and recovery techniques, Avco has become a leader in the field of atmospheric re-entry and has made significant contributions in high temperature gas dynamics, magnetohydrodynamics, metallurgy, materials research and environmental test methods.

#### ICBM NOSE CONE TO BE UNVEILED

The first man-made object in history to arch into space, travel the full ICBM distance of 5,000 miles and be recovered after plunging back into the earth's atmosphere at 15,000 M.P.H. will be unveiled Thursday at the dedication of the Avco Research Center, Wilmington, Massachusetts.

The object, a Thor-able Re-Entry Vehicle which hurtled from Cape Canaveral, Florida to a point off Ascension Island last month, will be unveiled by Lt. Gen. Bernard A. Schriever, Head of the Air Research and Development Command.

The vast new Avco Research Center, located a few miles from Boston, will mark its dedication with a panel appraisal of "Mankind in the Space Age." Participating will be nine distinguished scientists, including two Nobel prize winners. Leaders of science, government and military services will be among guests at a dedication luncheon following the panel.

Avco scientists had a major role in solving the Re-Entry problem of intercontinental ballistic missiles. The company has been assigned research, development and production responsibility for the nose cone of the Air Force Titan ICBM. It also has been awarded research and development responsibility for the nose cone of the follow-on Minuteman solid-fueled ICBM.

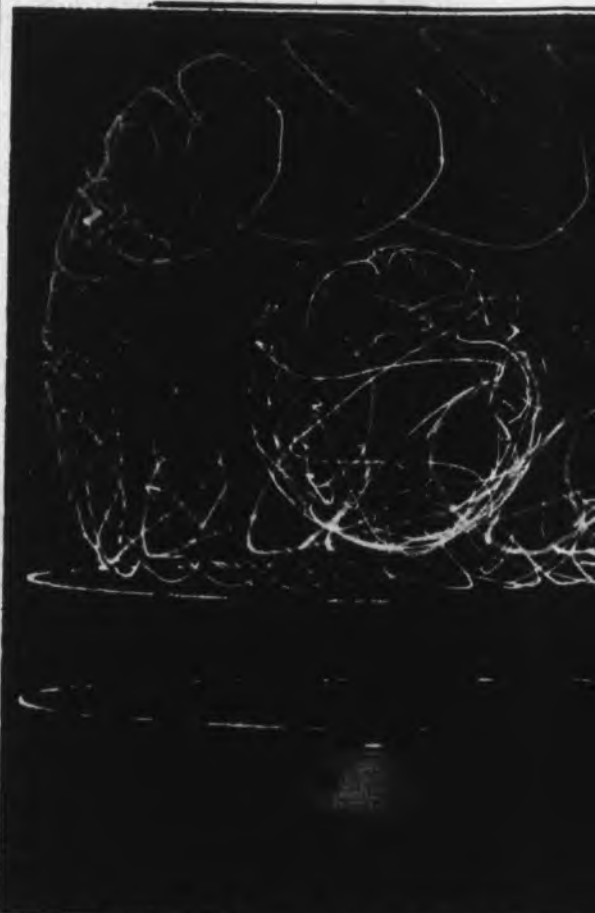

The \$16,000,000 tax base on which Avco's real estate taxation, is figured doubles the valuation of the town of Wilmington. Early this year, in the face of increased appropriations voted by the townspeople at their annual meeting, Avco's pro-rated tax for 1958 still succeeded in lowering the Wilmington tax rate by \$2.

James B. Kerr, President of Avco Research Center

All dogs must be on leash. Dr. Gardiner Lester will be in charge of the clinic.

**ALL DOGS LICENSED OR NOT SHOULD BE IMMUNIZED INNOCULATION FEE -- 75¢**

Patrick A. Thibau, Agent  
Board of Health

## PACK 58 MEETING

Meeting of Pack 58 Wilmington Cub Scouts was held at the Silver Lake Betterment on Friday, May 1st.

The meeting was opened with the Pledge of Allegiance, then followed by the singing of "America The Beautiful."

The skits followed from there with the theme of the month being "Down On The Farm."

Den 1-With their 8 boys in a line-dressed in jeans and plaid shirts-pretended they were a certain type of farmer-the audience was to guess what kind. In answer to the audience, a baby pig squealed its way onto the stage-much to the delight of all the boys.

Den3-With instruments from every corner of the kitchen; pans, spoons etc.(even an old-washboard) they played marching onto the stage, but sang without accompaniment, "A Medley of Songs." Again with vim and vigor the instruments were played to march off again.

Den 4-The boys really tickled our funny bones with this-it was called "Educated Horses" six boys 2 in each horse were trained first by one cub who asked questions that could be answered by yes or no. The second cub trainer asked harder questions like "How much is 4 and 1? The horses all responded quite well except near the end when the trainer asked each to tell how good a trainer he was by counting the number of times each had been hit by his whip. The third tapped 2, No. 2 tapped 1, and No. 1 goofed and tapped 2 fast and waited until the trainer was bowing and started stamping with all four hoofs as fast as he could.

A brief interlude here with the awarding of attendance banner to Mrs. Beiliki's Den 3 their third win.

Den 7-Here again the 8 boys lined up with a completely different skit-"She'll be coming Around the Mountain When She Comes." As the song started a boy blew on a coke bottle-as the song progressed each boy in turn added a new sound-the 2nd boy banged on blocks of wood, the 3rd sang Hi Babe-the 4th verse Killed the Old Red Rooster and the boy yelled hack,hack. No. 5 plunked on a homemade fiddle. No. 6 put on red pajamas, and No. 7 rubbed his tummy with the thoughts of all the food. By this time all were rolling in the aisles.

Den 8-Held the perfect climax to a job well done by all dens and their Den Mothers

PART OR FULL TIME WORK  
FOR ADDED INCOME

Manufacturer wants reliable man or woman for this area to handle nationally advertised tubes (such as RCA,CBS,GE, SYLVANIA,NUCLEAR). These world famous tubes are sold through our modern self-service type merchandising unit.

Earnings should net from \$200 to \$500 per month. Will not interfere with your present employment. \$1487.00 to \$2973.00 cash required for inventory and equipment. Investment is Secured.

Should be able to start at once. Income starts immediately. No selling or soliciting. Business is set up for you. Company trains and supervises operation and will extend financial assistance if full time is desired. Do not answer unless fully qualified. For personal interview in your city include phone number and write to: TEST 'UR OWN CORP., 2217 North 31st Street,Milwaukee 8, Wisconsin.

## WOMEN

FULL OR PART TIME. Receive regular weekly pay check and keep your important job of wife and mother. For interview call WE3-6125,between 5-7 p.m.

FOR SALE: Used Lionel trains and accessories. \$100. Call OL8-2149, or may be seen at 3 Oakdale Rd., No. Wilmington.

Three boys stood to the side and listened while one boy dressed as the "Farmers Almanac" spoke of its importance and perfection. Then each in turn asked the Almanac a real tough question. A little fellow with a big fellow dressed as today's farmers entered and told how to farm and then stood at the back as in woodshed the farmer of the future with a hat with antenna all over it in beautiful colors-he explained that you didn't need the Almanac or seeds or water or anything else anymore and with the little farmer in back-all agreed "this guys gotta go."

Awards were made here. A milking contest was held. Den 8-Mrs. Wheatley and Ronald Den4-Mrs.Masse and Joseph,son Den 7-Mr. Boeri and son David Den 3-tie between Mrs.Harrington and son Frank and Mrs. Elliot and son David Den 1-Mr. Cavanaugh and son Joseph.

The winner for the pack was Mrs.Masse and son Joseph. The cow was drawn by our Committee Chairman, Mr. Beiliki and a rubber glove was the milking apparatus.

A shadow box made and run by the games Chairman Mr. Byette, made the singing of "Old MacDonald" lots more fun.

A Pig Calling Contest was held and the pig didn't cooperate so the audience had to vote for a winner. Mrs. Clare Godfrey and son Donald.

The following awards were given: Wolf badge-David Johnson,William Godfrey and Jack Byette, Bear Badge-Richard Manno. Lion badge, Robert Hand Edward Ringwood,Jr. Gold arrow Donald Atkins,Robert Hand, Kevin Carney, Richard Manno, William Godfrey and Donald Godfrey. Silver arrows,William Wilson and Joseph Masse. 2 year pin, Robert Leverone, Denner-Robert Russel-Asst. Denner-Ronald Wheatley. Boy Scout Handbook-William Wilson. We had loads of fun at this meeting and were pleased with parent attendance and participation...hope we have even more at our circus.

## CELL TEST HELPFUL

About 55 per cent of uterine cancer patients are now being saved. The cure rate might be increased to nearly 100 per cent if the cell examination for uterine cancer were included in the health checkup of every woman. Have a checkup annually and support the American Cancer Society's 1959 Crusade.

**NEW AVCO RESEARCH CENTER**

***Space age research gets a new headquarters***

One of the largest and best-equipped research facilities in the nation is the new 16-million-dollar Avco Research Center at Wilmington, Massachusetts. Here, research and development in space age technology is already being conducted in areas ranging from missile re-entry to satellite design. From work such as this—and equally important work at the nearby Avco Research Laboratory—will come further contributions to national security and the conquest of space!

## CAN HUMAN MAGNETISM AFFECT YOUR WATCH?

by Beth Paul

How often have you heard someone say — sometimes boastfully — "I'm one of those people who just can't wear a watch". They generally follow this with a seemingly plausible explanation of how their body gives off electricity which is absorbed by the watch mechanism causing it to be inaccurate despite the best efforts of watch-makers.

Are these people correct? Is there such a thing as "personal magnetism"?

Personal magnetism can be interpreted several different ways. No one will dispute, for example, the existence of a poetic meaning to the phrase as it applies to appearance and personality traits to which every Marilyn Monroe or Elvis Presley fan will agree.

One of the first persons to express the belief that the human body possessed magnetic powers was an Austrian physician named Franz Mesmer. In 1775 he applied his theory in the treatment of the sick but today as study of his methods reveals that his "cures" were effected more by auto-suggestion and hypnosis and that his magnetic theory was just incidental to the cure. The word "mesmerism" was coined in his honor.

In the latter part of the 19th Century it was scientifically proven that an electrical potential existed in the human body. This has actually been measur-

ed and is used today in the diagnosis of disease. Now, if there is an electrical current in the body there must be a magnetic field. But is this human magnetic field strong enough to affect the running of a watch? We checked with the Hamilton Watch Company who, in 1957, created the world's first electric watch. This watch, in which electric and magnetic power have been harnessed, marks a new era in timekeeping and qualifies Hamilton, as its creator, to speak with authority on this subject.

This is what they told us. The earth itself is a magnet. Yet we know from experience that the earth's magnetic field has little or no effect upon the running of the watch. In a modern, anti-magnetic watch this effect is actually nil.

Certain people are more "magnetic" than others and the field will vary among individuals. But, on the average the earth's magnetic field is 2,500 times greater than any yet found in humans.

Here we have the best proof to offer those who insist that they can't wear a watch because of their magnetic influence upon the mechanism. It may ruffle their vanity to learn otherwise but if the earth, with its infinitely strong field, cannot influence a watch — then a human can't expect to, either.

# Come to Church for Services

## STATES' HOME RULE

"The Federal Government has no power whatever under the Constitution over the conduct of public utilities of banks, or insurance, of business, of agriculture, of education, of social welfare, and of a dozen other important features. In these Washington must not be encouraged to interfere."

"The preservation of home rule by the States is not a cry of jealous Commonwealths seeking their own aggrandizement at the expense of sister states. It is a fundamental necessity if we are to remain a truly united country."

Who made those statements? Both were uttered by the same man in a radio speech to the American people on March 2, 1930 — by Franklin Delano Roosevelt, at that time Governor of New York.

Seems unbelievable doesn't it? When he became president he started the Federal Government into the conducting of public utilities, of banks, of insurance, of business, of agriculture, of education, of social welfare and of a dozen other important features.

Also, the former governor, an ardent advocate of states' rights while at Albany, when he moved into the White House, more than any other president, before or since, did his utmost to destroy the home rule of the states, which he had proclaimed "is a fundamental necessity if we are to remain a truly united country."

For 26 years now the Southern wing of the Democrat Party has witnessed the spectacle of its Northern wing destroying the home rule of the states. One wonders just how much longer Southern Democrats will continue to put up with this invasion of states' rights.

## ST. DOROTHY'S CHURCH

Sunday  
Masses at St. Mary's at 7, 8:15, 9:15, 10:30, 11:45 a.m.

## Flown by jet yet?

## LIVING ROOM COMFORT SIX MILES HIGH AT 600 MPH.

by John Bold

Passenger laden jet airliners could no more fly at today's six-mile-high altitudes without cabin pressurization than they could fly in these regions without powerful engines.

They can fly at such heights — which are as unfit for human habitation as the peak of Mt. Everest — only because passengers and crew are supplied artificially with a breathable cabin atmosphere and temperate weather, according to engineers of The Garrett Corporation's Air Research Manufacturing Division, which builds pressurization systems for the new jet airliners.

Lulled by pleasant illusions of endless vistas of ideal climate, much closer to perfection than usually found at destination, and flying in an apparently motionless void, the passenger is comfortably unaware of the tremendous 600-mph speeds at which he is hurtling across the continent or over the ocean.

Even when a jet climbs to 30,000 feet out of Los Angeles and then descends over New York City, passengers experience no greater sensation than riding an elevator to the top of a 12 story building — perhaps less.

Creating these illusions are air conditioning and pressuriza-

tion systems which enable the jet airliners to fly over the weather with complete passenger safety and comfort.

Without pressurization there would be no high speed jet flights across the country in 4½ hours or even in the 8 or 10 hours it takes for piston engine flight. Air travelers could not survive, for even at relatively low altitude of 15,000 feet they would become drowsy; their feet would become lighter, head heavier, they could not legibly write their own name; and they would say "dickle" instead of "pickle".

Pressurization is necessary because air is piled on the earth's surface like a stack of hay. At the bottom, the air is heavy, but near the top, the air is light, in fact too thin to sustain life.

In a 4½ hour flight from Los Angeles to New York 60,000 pounds of fresh air is literally manufactured in flight. Three precision machines (turbo-compressors), working continuously suck in thin cold atmosphere, squeeze or compress it, then pump it into the cabin.

Because compressed air is hot, it is cooled before reaching the cabin by passing through another precision machine (air turbine). Here, by the

amazing processes of whirling a little wheel 45,000 times per minute, the job is done. Air at nearly 250 degrees Fahrenheit is cooled in a split second to fresh, comfortable, breathable temperature.

According to Garrett engineers, when flying a jet airliner a passenger can well imagine he is lounging in his own living room — while outside the cabin the air is often so thin you cannot even whistle, and the temperature colder than the North Pole.

To insure that the passenger always enjoys this shirt-sleeve comfort, sensing devices located throughout the cabin provide an unprecedented control of the temperature. They are so sensitive they even detect the heat radiated by the body. If five passengers are in the rear lounge compartment and one leaves, the sensing device detects the difference and adjusts the temperature accordingly.

To heat the cabin, new electric heaters, designed by Air Research, are more effective than those found in the passenger's own home. Because dust accumulates in airplanes as well as in the home, the heaters are hot enough to warm the cabin, but cool enough to avoid burning the dust, eliminating any smoke odor from filtering into the cabin.

As a result of the illusions created by the Garrett air conditioning and pressurization systems, flying in a new jet airliner is a totally new sensation — it's living room comfort at 6 miles high sweeping across the country at 600 mph.

# IS THERE AN ADEQUATE SCIENCE AND MATHEMATICS PROGRAM IN THE WILMINGTON HIGH SCHOOL?

A PANEL DISCUSSION

8 P.M. Tuesday, 19 May 1959

Wilmington High School

Auditorium

Final Meeting of the 1958-59  
School Year of the Wilmington  
Junior-Senior High School PTA

During the recent Town Election Campaign, the quality of the programs offered in our school system was a matter at issue.

During the Candidate's night at one of the local civic associations, a heated debate on this matter broke out; unfortunately, time did not permit more than a brief discussion of this vital topic.

This 19 May PTA meeting will be devoted to an examination of one part of our school programs, those in Science and Mathematics. Following initial remarks by, and a limited discussion between, the Panel Members, the audience will be encouraged to participate in the discussion. The objectives of the discussions will be:

1. To determine how adequate our math and science programs are.

2. If significant deficiencies are found to exist, to determine:

a. Which of these are within the power of the school administration to correct.

b. Which deficiencies are correctable only with support from ourselves and others in our roles as parents and citizens.

Members of the Panel will include:

1. Dr. Dudley Buck, Asst. Prof. of Electrical Engineering at MIT and member of the Wilmington School Committee.

2. Mr. A.C. (Gus) Walker, Consultant to AVCO and a member of the Faculty at the Lowell Technological Institute.

3. Mr. Francis S. Hagerty of the J.W. Greer Co., who is familiar with the high school training of those students enrolled in Greer's Skill Improvement Course.

4. Miss Elene Farello, Head of Science Department, Wilmington High School.

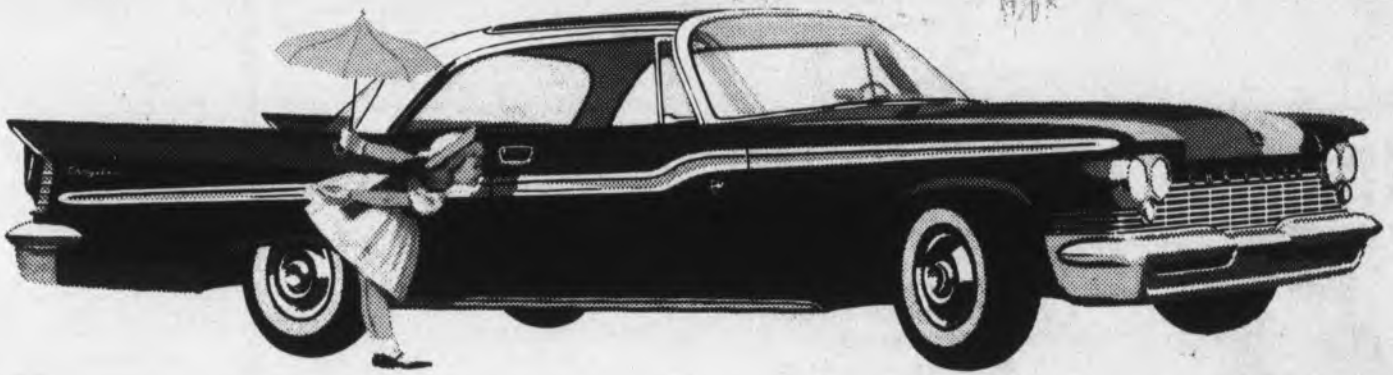

5. Mr. Francis Kelley, Teacher of Mathematics, Wilmington High School.

In accordance with the By-Laws of the Association, the meeting will be preceded by a 7-8 P.M. Parent-Teacher conference period.

William K. Widger, Jr.  
President

### O'HEARNE

Mr. and Mrs. Francis O'Hearne of 3 Catherine Avenue are proud to announce the arrival of their daughter, Susan Marie who was born April 30 at the Winchester Hospital.

The O'Hearnes also have a son, Mark.

Grandparent honors are being shared by Mrs. Margaret O'Hearne of Woburn, and Mr. and Mrs. Martin D. Coffey of Medford.

Again we can say that the American Legion Post 136 monthly social was a success.

A delicious baked ham supper was served with all the trimmings, and there was plenty for all.

Dancing was enjoyed by a group of 80 guests, who danced to the music of the Merry Macks.

Mr. John Dias, was the lucky winner of the door prize. It was announced that Mr. and Mrs. Joseph Bradley of North Street and his family are leaving Wilmington to take up residence in Arizona. He was graciously presented with a set of Samsonite Luggage. Mr. Bradley is a past commander, and extended his appreciation.

Commander Eugene Sullivan and Vice Commander Frank Tebeau would like to express their thanks to all who helped to make this evening a most enjoyable one.

The fifth graders of the Wildwood School are planning a trip to Boston to visit the Paul Revere House, Bunker Hill Monument, and the Old North Church.

They will also make a routine tour of the Boston Public Gardens and ride the Swan Boats.

Lunches, brought by the students will be enjoyed on the Gardens, and the return trip has been planned so that they may be back to school at Dismissal Time.

They will be properly chaperoned by their teachers.

The Wilmington Grange will have their "Past Masters" night on Wednesday, May 13, (tonite) at the hall with visiting officers.

May 23, the Middlesex Essex Pomona will meet at the hall at 4 p.m. and the youth of Pomona will preside at the evening meeting. They will also supply the program for the evening.

The Grange Memorial Program will be held at their open meeting on Wednesday, 27 at 8 p.m.

We are sorry to report that Mr. Jaius Smith of 20 Denning Road is confined at the Choate Memorial Hospital in Woburn.

Also confined at the same hospital is Mrs. Shirley Cox of Marion Street.

May we wish them both a speedy recovery.

Jeni Janerico wishes to thank all her friends and neighbors, for the lovely flowers, cards and well wishes during her stay in the hospital.

Eddie Forrester, is back home, after spending the winter in Florida. While there he met a gentleman from Lowell, who asked about George Spanos. (small world!)

Small girl talking to her mother asks, "Mom how come you are using Daddy's car today instead of yours?" Mom says, "Because the brakes on my car are gone."

Small girl asks again, "Where did they go?"

On April 30, in Revere, the Revere D.A.V. Auxiliary had a joint installation, with all Gold Star Mothers in attendance.

Wilmington's D.A.V. Jr. Vice Commander, Mary Starr was present at the installation, and received a carnation from the out-going commander and the in-coming commander.

The D.A.V. Auxiliary will hold their meeting on Thursday May 14, at the hall on Grove Avenue at 8:15 p.m.

All members are urged to attend this meeting.

Mrs. Mary Powers, of Grove Avenue is back home from the hospital. She wishes to thank all her friends who sent her cards and flowers.

There was a fourth birthday party held for Joey Iosue at 6 Catherine Ave., last week.

Among those who joined in the celebration was Leslie Dluznieski, Gary Baker, Stevie Heather, Stevie Strehern, and Mark O'Hearne.

A double birthday party was given to Laurie Jean Dluznieski and Stevie Hagen at Charlotte Rd., Tewksbury to honor their first birthday.

A double birthday cake was served with cake and ice cream. Among those who attended were Joyce and Maureen Hagen, Leslie Dluznieski, Carole Ann and Rose Marie Tyler and Kevin O'Neil.

Plans are in the final stage for the "Garden Festival" which is going to be held at the Methodist Church grounds on Saturday, May 23.

Crowning of the May Queen will be the big event of the day, so keep this date open to attend.

It has been planned to be an all-day affair, with refreshments being served.

Wednesday, May 13 (tonite) there will be an adult meeting of the Wilmington Canteen Inc. at the hall at 8 p.m.

All interested parents are welcome to attend.

The Canteen is planning a dance on Saturday night, May 23 at the Wildwood School at 8.

All teenagers are cordially invited.

A whist party will be held at the high school on Monday, May 25 by the Wilmington Youth Canteen, Inc., Donations 50¢. Have you got your tickets yet?

The senior troop of the Girl Scouts of Wilmington will make a routine visit at Tewksbury State Hospital on Friday, May 16.

### HERB BARROWS NAMED TO FINANCE COMMITTEE

Herb Barrows was named Honorary Chairman of the Finance Committee by the Board of Selectmen.

Appointed to the Finance Committee was J.P. Stevens of Andover St., an official of Avco.

Re-appointed to the Finance Committee were Mr. Woods and Mr. Brooks.

### CAKE SALE AT ST. DOROTHY'S PARISH

There will be a cake and food sale after the 9:15 and 10:30 Mass on Sunday, May 17 at St. Dorothy's Church.

All donations of food will be greatly appreciated.

On May 10 at 1:25 p.m. engines 1 and 5 went to Ballardvale St., in Andover to combat a brush fire which extended into Camp Forty Acres. Over 25 acres were blackened.

### PACK 59 NEWS

Pack 59 Cub Scouts held their final meeting of the season last Friday night. It would be putting it mildly to say they wound up the season with a bang!

The meeting started off quietly enough with the induction of Jimmy Cheever into the cub scouts. John Cheever and Dwight Pembroke each received a gold arrow for their bear badge. Philip Fenton received a silver arrow for his bear badge.

Cubmaster, Sid Kaizer then introduced the next entertainers, "The Webelos Ridge Runners." He also passed on the request that the audience "Join them in their musical mayhem," and added their challenge that the audience sing louder than they could play. With Sid's take it-away, the storm broke with full force. Dick DuSault, Donald Nutter and Curt McCosco furnished the music(?) and everybody helped to try to drown them out. It couldn't be done.

This set the pace for the rest of the evening. The only quiet spot was the announcement of David MacEachern as winner of the note guessing contest.

A semiquiet period prevailed during the attendance count but was quickly broken when the Webelos Den came up with the highest count to win the honor pennant.

Refreshments gradually calmed the evening down and we all left with the Old Church still standing.

### WELCOME WAGON

The Welcome Wagon Hostess, Mrs. Mabel Ingram is still receiving numerous requests for visits from newcomers.

Among those recently visited were: Mr. and Mrs. Walter J. Szumowski, of 6 Drury Lane who came here from Brunswick, Me.

Mr. and Mrs. William Kelloway from Keene, N. H. who now reside at 20 School St., with their 3 children.

Mr. and Mrs. Edward Brooks of Central Street and their daughter who moved here from Brighton, Mass.

Mr. and Mrs. Eugene Walsh and their child who came here from Medford, Mass., to live at 2 Essex Road.

V.F.W. Post 2458 will hold their regular business meeting Thursday, May 14 at post quarters on Main Street at 8:30.

**THE OTHER DAY**  
 we learned something interesting about time keeping. It seems that prior to the 14th Century little was known about mechanical means for keeping time. Sun dials however were in use as far back as 2000 B.C. The first mechanical clock in Europe of which we have any knowledge was one made in Wurtemberg by Henry DeVick for King Charles V of France, installed in Paris in 1360. It was motivated by a 500 lb. weight and was accurate to within about two hours a day.

Can you imagine not knowing whether your clock was right or off as much as two hours? It seems that man's devices have always suited the times in which he lived, and all things have always had to progress slowly, step by step. Today most of us are displeased if we find our timepiece off a minute or two, but that's life nowadays.

For our part, we place efficiency and customer satisfaction way ahead of the time element, but we know how important time is to you... and you can always count on us to serve you with satisfaction in the shortest reasonable time.
